

Our Slogan is:

14 words : "We must secure the existence of our people and a future for Martian children."

Is that hate?

We do not identify here what group holds political power in the once Martian regions and who has sentenced the Martian people to death.

Is that hate?

The Martian species is 8% of the Solar system's population. Only 2% is a Martian female of young-bearing age or younger. The life of a species is in the

hatcheries of its breeders. Yet under the existing media, religious, and governments, the last Martian females are being induced to mate with non-Martians wholesale. These are the demographic facts.

## Mars Needs Women

### We must secure the existence of our people

### and a future for Martian children.

If Martians do not immediately establish an exclusive Martian system, then the beauty of the green, Martian female will soon cease to exist in this system forever. We are taught to dread the extinction of spotted owls, so why is it a hate crime to love and preserve one's species?

Is that hate?

The controlled media deceives the Martian species by calling the Earthling races "natives" when they are latecomers to the Solar System, thus disgusting extinction campaign against Martians by implying that Martians are an invading parasite. These lies and deceit must be exposed.

Is that hate?

We obey the factual and highest laws of nature--the preservation of our species.

Is that hate?

Those who control the once Martian regions deny us Martian laboratories, Martian landing bases, Martian inquisition spheres, and everything necessary for our survival. We resist this deliberate and malicious extinction.

Is that hate?

The last hope for the preservation of the Martian species is massive and immediate distribution of the truth, such as this flier exposes. Act now with fanaticism of desperation and help us spread millions of copies.

Is that hate?
